- Malayalam(Fluent)

PROFESSIONAL SUMMARY

Enthusiastic and skilled Python Full Stack Developer with 6 months of hands-on internship experience at Srishti Innovative. Worked on live projects like Medi AI and Aerotrack, gaining strong experience in both front-end and back-end development using Python, Django, HTML, CSS, and JavaScript. Certified in Python Full Stack Development (September 2024). Known for quick learning, problem-solving, and a strong passion for technology and innovation. Now seeking a full-time developer role to apply my skills in a dynamic and growth-focused environment.

INTERNSHIP   **2025-PRESENT**

SRISHTI INNOVATIVE TECHNOPARK

Python Full Stack Developer

- Contributed to the development of real-time web applications like Medi AI and Aerotrack using Python, Django, HTML, CSS, JavaScript, and SQLite.
- Gained hands-on experience in both front-end and back-end development, API integration, and debugging.
- Collaborated with a development team to build user-friendly features and ensure responsive design.
- Followed agile methodologies and participated in code reviews and daily stand-ups to enhance project efficiency.

PROJECTS

MEDI AI-AI Powered Healthcare Platform
Role-Full Stack Developer Intern   **2025**

- Developed a healthcare platform with AI chatbot, appointment booking, and skincare e-commerce modules.
- Built core features using Python, Django, HTML, CSS, and JavaScript across Admin, User, and Doctor modules.
- Integrated NLP for chatbot conversations and ML for personalized recommendations.
- Designed responsive and secure user interfaces for patients and doctors.
- Improved healthcare accessibility through AI-driven automation and real-time support.

Aerotrack – Flight & Hotel Booking Platform   **2025-present**
Role: Full Stack Developer Intern

Technologies: Python, Django, HTML, Tailwind CSS, JavaScript, SQLite

- Developed a full-featured web application for flight and hotel bookings with three modules: User, Owner, and Admin.
- User Module: Enabled profile management, dynamic booking system, and hotel suggestions based on user input. Implemented notifications for ticket discounts.
- Owner Module: Built tools for airline registration, ticket pricing, discount control, and user notifications. Designed a dashboard for managing airline data.
- Admin Module: Implemented features to view, manage, and remove fake users, owners, and hotels. Created a dashboard to monitor total users, owners, and hotel listings.
- Used Tailwind CSS for modern, responsive UI design and planned future ML integration to predict platform usage trends.
